

An Introduction to CommsLearning

Who we are and what we do

"Tell me and I will forget,
show me and I may remember,
involve me and I will understand."

Confucius, Chinese philosopher & reformer, 551 – 479 BC

An overview of CommsLearning

CommsLearning is founded on the above Chinese proverb. We believe that by genuinely engaging with our audience and tailoring every package we write, we can ensure maximum understanding, and achieve the results our customers need.

Who are we?

We are an international provider of learning solutions for the IT and Telecommunications world. We are a group of specialists from a range of backgrounds who collectively bring a variety of unique and valuable skills to the company. By recruiting both breadth and depth of knowledge, we are able to produce focused and targeted solutions at a level to suit your needs.

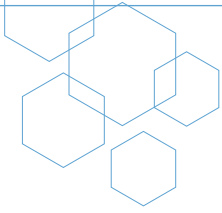

What do we do?

We provide bespoke training solutions delivered in a way to suit you and your business. We train the *right people* on the *right subject* using the *right medium* at the *right time*.

Popular courses

- Convergence Uncovered
- Core Telecoms Systems & Protocols
- Channel Development Program
- ICT Network Essentials
- Sales Skills
- Relationship Management

What does CommsLearning stand for?

We address the 'So what' factor

Before delivering any learning solution, we invest our time with you, so we can understand what your specific, 'so what' factor is. For example, you could learn in great detail how Voice over IP works, but without expanding on how it is relevant to your business and ultimately your company's bottom line the training is of no more value than reading from a manual! For this reason, we conclude each module by explaining how the content is relevant to both you and your customers.

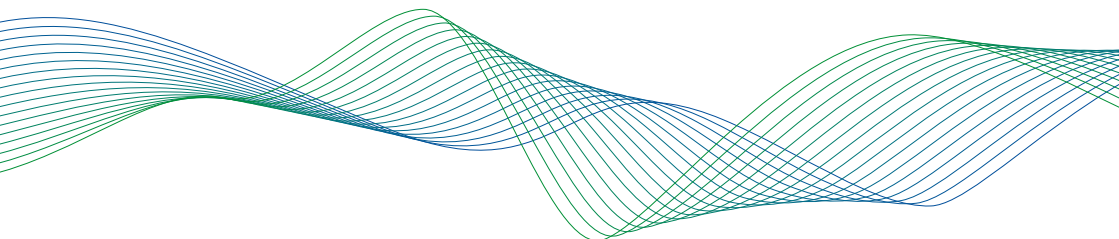

Those that CAN DO..... teach at CommsLearning

In reference to that old adage, "Those who can't do, teach!" we insist, "Those that CAN DO, teach at CommsLearning". We only recruit trainers who have a strong record of success and achievement in their chosen field.

Delivery Methods

- Face to face
- Workshops
- Virtual classrooms
- E-learning
- Train the trainer
- Documentation
- Pod cast
- Video modules

"Keeping up to speed with technology can sometimes feel like swimming against the current, and without the right approach you may end up sinking."

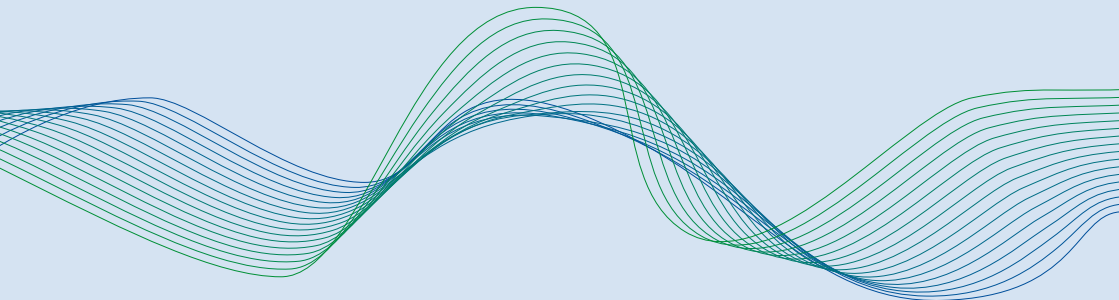

Perpetual development – *How to swim up-stream*

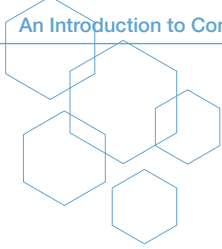

There are few sectors that are as fast moving as IT and Telecoms. It's often said that if you can either afford it, or understand how it works... it's probably obsolete! This is why keeping up to speed with technology can sometimes feel like swimming against the current, and without the right approach you may end up sinking.

The key to conquering this challenge is to plan your route carefully, taking the path that delivers the biggest gain, for the least effort (time and investment).

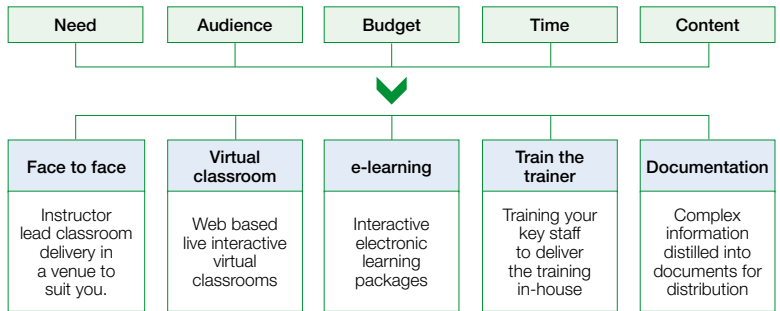

This is where CommsLearning can help. We can work with you to get a detailed understanding of your training roadmap, acknowledging that we may potentially be one stepping stone in a wider education strategy. However, by understanding your specific goals, we can maximise your gains so your business can continue to move forward, on the path most suited to your specific objectives.

At CommsLearning, we work for you

We will always choose the right approach to meet your requirements and to deliver the desired outcome.

Want to hear more?

Give us a call to discuss your training requirements in more detail.

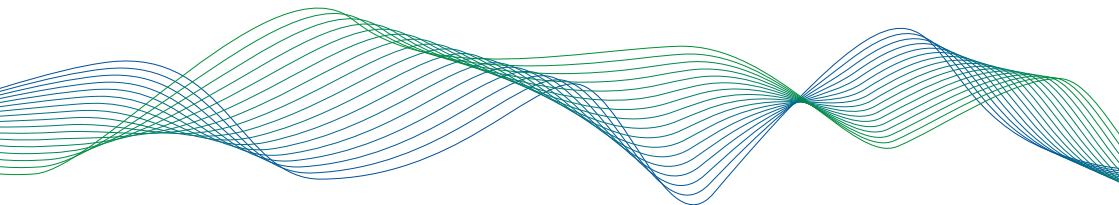

Best Regards,

The CommsLearning Team
